

AL013:

Modern Analytical Laboratory: *Management, Operations, Analytical Instrumentation, Equipment, Safety & Quality (ISO 17025)*

Training Description:

Knowledge of modern analytical instruments and techniques is necessary to solve any laboratory problem. The course provides basic analytical analysis methods and troubleshooting techniques of the most used instruments in an analytical laboratory. In addition, it offers elegant tools for qualitative and quantitative data techniques with practice work on analysis software. Safety in the laboratory is very important for chemists. Quality ISO 17025 will be explained theoretical and practical training. The aim is to enrich and advance the skills and knowledge of participants to understand analytical chemistry technology.

Training Objective:

By the end of the training, participants will be able to:

- ✓ Impart participant's fundamental techniques of analytical chemistry
- ✓ Identify the application of analytical methods
- ✓ Understand the instruments' techniques
- ✓ Know how to judge the accuracy and precision of experimental data and how these judgments can be sharpened by the application of statistical methods
- ✓ Understand the tools and techniques used to achieve process analysis, qualitative methods, cause and effect diagrams and calibration graphs
- ✓ Understand ISO 17025 requirements
- ✓ Know all safety tools required in the laboratory
- ✓ Be familiar with the latest analytical methods

Training Designed for:

This course is intended for all Chemists, Lab Technicians, Chemical Engineers, Instrument Engineers and Lab Supervisors/Managers, QA/QC, Lab Analysts and R&D.

Training Program:

DAY ONE:

- ❖ PRE-TEST
- ❖ Introduction to analytical technique
- ❖ Methods of analysis
- ❖ Basic laboratory technique: sample preparation, analytical measurement, fundamental concepts, chemical equation, acidity of solution, buffers
- ❖ Gravimetric methods of analysis
- ❖ Preparation of chemicals
- ❖ Acid-base titration methods

DAY TWO:

- ❖ Complex-formation titration methods
- ❖ Oxidation-reduction titration

- ❖ Precipitation titration methods
- ❖ Reference/indicator electrodes
- ❖ Potentiostatic coulometric
- ❖ Potential selectivity of electrolytic methods
- ❖ Manipulation methods: solid phase extraction and derivatization

DAY THREE:

- ❖ Chromatography technique
- ❖ Gas chromatography (inject system, column, detector types)
- ❖ High performance liquid chromatography: mobile phase, pumping system, sample inject system, column, detector types
- ❖ Other chromatography techniques
- ❖ Data management software
- ❖ Analytical retention process
- ❖ Spectroscopy technique and molecules identifying

DAY FOUR:

- ❖ Infrared absorption spectroscopy
- ❖ Nuclear magnetic resonance spectroscopy
- ❖ Mass spectroscopy
- ❖ UV/IR absorption spectroscopy
- ❖ Raman spectroscopy
- ❖ X-Ray spectroscopy
- ❖ Electron spectroscopy

DAY FIVE:

- ❖ Atomic absorption
- ❖ Instruments troubleshooting: column contamination, broad in the peak bandwidth, ghost peaks, system peak, contamination in the inlet filter, change solvent in mobile phase (HPLC), interferences in the AAS, detector contamination.
- ❖ Safety Operation
- ❖ Quality ISO 17025 requirements
- ❖ Quantitative methods: calibration methods, external and internal standards, outliers test, determination of analyze concentration, standard addition method, error in quantitative analysis, confidence limits, detection limit, repeatability, reproducibility and method validation.
- ❖ Course Conclusion
- ❖ POST-TEST and EVALUATION

Training Requirements:

“Hands-on practical sessions, equipment and software will be applied during the course if required and as per the client’s request”.

Training Methodology:

This interactive training course includes the following training methodologies as a percentage of the total tuition hours:

- 30% Lectures, Concepts, Role Play
- 30% Workshops & Work Presentations, Techniques
- 20% Based on Case Studies & Practical Exercises
- 20% Videos, Software & General Discussions
- Pre and Post Test

Training Certificate(s):

Internationally recognized certificate(s) will be issued to each participant who completed the course.

Training Fees:

As per the course location - This rate includes participant's manual, hand-outs, buffet lunch, coffee/tea on arrival, morning & afternoon of each day.

Note: The 5% VAT (Value Added Tax), will be effective starting 01st of January 2018 as per the new regulation from the UAE Government. The VAT applies for all quotation both for local and abroad.

Training Timings:

Daily Timings:

07:45 - 08:00	Morning Coffee / Tea
08:00 - 10:00	First Session
10:00 - 10:20	Recess (Coffee/Tea/Snacks)
10:20 - 12:20	Second Session
12:20 - 13:30	Recess (Prayer Break & Lunch)
13:30 - 15:00	Last Session
